Company profile:

Flexibility is our business.

Under this motto the company strives to always find the ideal solution for their customers. Their experienced staff is at your disposal for finding the optimum dimension and design in line with your specific requirements and plant conditions.

In cooperation with plant operators GFG have developed special expansion joints which, even after several years of use, have unlimited operation capability

GFG expansion joints are suitable for use with extreme medium and flange temperatures.

Manufacturing- / delivery programme:

GFG-Expansion Joints are used in:

Power plants (Boilers, DeNOx-plants, Flue gas desulpharization plants (FGDP), Gas Turbine plants), Incinerator plants, Dust removal and filtering plants, Cement industry, Steel industry, Dehydration plants, Chemical industry, Conveying plants, Fan construction / ventilation, Ship building and marine technology and so on.
