Company profile:

IBG Monforts Fluorkunststoffe is a manufacturer of PTFE (Teflon®) finished parts, semi finished parts, component parts and devices for chemical industry and chemical process engineering. Your partner for plant components, coatings and anti-corrosion solutions in the field of piping and plant construction.

Due to their professional staff and long experience with products made of fluoroplastic materials, in particular PTFE and PFA, IBG Monforts are experts in producing and processing these materials.

The above mentioned materials can also be combined with steel or metal parts. On our customers request we are also able to supply complete PTFE devices and component parts.
