Company profile:

As a leading supplier of piping systems and components from plastic and metal we develop and supply application-orientated solutions for a secure transport of liquids and gases..

GF Piping Systems deliver high-quality products for industrial use, for water and gas supply as well as for building services engineering.

GF Piping Systems offer over 60.000 products for diverse applications and specialized markets.

Manufacturing- / delivery programme:

PIPES With years of experience in extrusion processes we can guarantee highest precision and tolerance values for your applications.

PIPE FITTINGS

Tank adapters, flanges, fittings, compression fittings, pipe couplings, screw joints, etc

PIPE SYSTEM - Preinsulated pipe system COOL-FIT
 - Double pipe systems CONTAIN-IT Plus

VALVES & ACTUATION

Butterfly valves, pressure control valves, solenoid valves, diaphragm valves, ball valves, angle seat valves, variable area flow meters, check valves, special valves, strainers, utility valves.

Electric actuators, pneumatic actuators, pneumatic diaphragm valves DIASTAR.

GEORG FISCHER
PIPING SYSTEMS

Manufacturing- / delivery programme:

MEASUREMENT & CONTROL

Instruments for measurement and control of flow, pH/ORP, temperature, pressure, conductivity and resistivity and multi controllers.

JOINTING TECHNOLOGY & TOOLS

- Mechanical jointing
- Solvent jointing
- Fusion jointing

SPECIAL EQUIPMENT

Construction and manufacturing for special requirements.

CONSULTANCY FOR PROJECTS AND APPLICATIONS

Our business is driven by our customers' requirements.

PLANNING SERVICES

Our experts will be at your service from project planning stage until final implementation.

CUSTOMER TRAINING & WORKSHOPS

Workshops can be attended at our in-house training center, the „GFForum for theory and practical application“, or at your local premises.

There are also certified training programmes where users are instructed in glueing, welding and installation techniques as well as quality management methods.
