Company profile:

SAS manufacturing processes and logistics services are totally dedicated to their customer's needs. Short reaction times, immediate order processing and on-time delivery is what the company aims to achieve.

To learn more about the company and what they can offer you please refer to the SAS website or get in touch directly.

Manufacturing- / delivery programme:

Gaskets, Seals

The manufacturing programme includes packings of pure black lead for spindles, mandrels, caps, housings and piping systems.

- High-temperature seals
- High-pressure seals

- spindle gaskets:
Gasket cartridges, gasket rings, packing pressure plate

- For housings and caps:
Sealing caps and flat seals
Spiral-wound gaskets and grooved gaskets

- For piping systems:
- Flat gaskets, spiral-wound gaskets and grooved gaskets.

Pipeline Couplings

- pipe joints with high tensile axial strength for metal pipes and plastic tubes
- pipe joints without tensile strength for all types of material.
