Company profile:

SPIR STAR® Druckschläuche AG is the specialist in the production of high-pressure hoses with a spiralized support made of high-tensile steel wires for use in a pressure range of 400 to 3.200 bar. The customer base includes companies from the Waterblasting, Oil and Gas and High-pressure Hydraulics Industries.

SPIR STAR® Druckschläuche AG with 80+ employees in Germany offers an individual service attending to individual customers' requirements. The experienced team stands for a dedicated customer service and excellent quality.

Manufacturing- / delivery programme:

High-pressure hoses

SPIR STAR® offers the right product for various applications by designing specific hose types for different needs. High-pressure hoses with IDs from 3 to 25 mm and working pressures up to 3.200 bar are available.

All hoses meet demanding requirements with regard to quality, service life and reliability featuring outstanding high-pressure characteristics and a great resistance to high temperatures.

For each hose type specially designed SPIR STAR® fittings are provided that have been tested and certified in accordance with DIN EN 1829-2.

Fittings

SPIR STAR offers a wide range of accessories like valves, adapters and tubes (690 up to 4.140 bar) made of different materials for various connections with inch-based or metric threads.
