### **Company profile:**

**TACOS** has been developing CAD systems for many years now which have just one goal: practice. The best solutions are, after all, those which not only fulfil your demands and wishes but surpass them. With professional know-how and technological pioneering work, our products are permanently optimized for these standards.

Owing to the co-operation with specialist firms and university institutes of various disciplines, new specialized knowledge keeps on flowing into our systems. Close contact with our customers and suppliers enables that **RU KON** is permanently adapted to rising standards of practice.

### **Manufacturing- / delivery programme:**

The CAD system RUKON  
for building services and plant construction: planning, design and implementation

- complete planning and calculation in one operation
- quick, three-dimensional design without additional time
- constant use of all system data
- automatic change-service in all project and presentation documents
- bills of material and bills of quantity automatically
- Output of all data for the fabrication
- MicroStation-integration
