Company profile:

wbr Rohr- und Bauelemente GmbH is the most technologically advanced supplier of pipes for construction use, as well as for industrial solutions, heating technology and filter manufacturing.

Durable and impressive material and product quality, the best development and manufacturing skills and an individual, solution-oriented service are the hallmarks of our business.

Manufacturing- / delivery programme:

Products Industry: Pipes are used in industry, e.g. for the filter industry

Longitudinally welded pipes

assembled to customer specifications

Steel, galvanised steel, stainless steel
Wall thickness: 0.2 to 1.5 mm

Measurements:

Pipe diameter 15 - 100 mm

in installation lengths of up to 6 m

Pipe diameter ≥ 100 mm

in installation lengths of up to 1.5 m

Pipes for the filter industry

- pipes with or without reinforcement beading
- support pipes

Steel, galvanised steel, stainless steel
Special alloys upon request

Measurements: smooth or profiled

DN 15 to 100 mm with wall thicknesses up to 0.7 mm

>DN 60 with wall thicknesses up to 0.6 mm, profiled

>DN 100 with wall thicknesses up to 2.0 mm, smooth

Product Development: Custom made pipes of highest possible quality

- Engineering and longstanding expertise of engineers and practical persons
- Competence in manufacturing by using different production machinery
- High-quality welding processes
- Economical manufacturing through most modern machinery, for large-scale production and also for smaller quantities
- Depending on the application area, it is also possible to tailor the pipes to specific customer requirements.
