Company Profile:

JETCLEAN GmbH was founded in 1998 in Duisburg, Germany. Since then the company have been busy developing and distributing solutions for the internal cleaning of tubes and hoses. Many of companys offerd solutions have become standard in the industry, for example mashines to clean industrial tubes made of plastic, copper, aluminium and other materials.

Providing competent and customer-focused advice about internal tube cleaning and technical cleanliness is the companys main priority.

Services and Product Range:

The right solution for every application, so for example the ptcsystem® which makes cleaning hydraulic lines and industrial tubes effortlessly simple or the FERRET machine for cleaning flue gas pipes in high-volume water boilers, economisers and waste gas boilers.

ptcsystem®
for cleaning of hydraulic lines and industrial tubes

FERRET machine
cleaning flue gas pipes in high-volume water boilers, economisers and waste gas boilers.

DUSTCONTROL industrial suction units
flexible and high performance industrial suction unit for every specific application

High-pressure HDS
