Company profile: Your specialist for of pipe systems

The SANHA group is one of the leading European manufacturers of pipe systems for drinking water, gas, solar, heating, cooling and sanitary applications for use in domestic and industrial settings. We have approximately 8500 items in our product ranges, covering most commonly used materials such as Copper, Copper Alloys, Stainless and Carbon steel, as well as our innovative Silicon Bronze, lead free fittings, for use in Drinking Water applications.

Our premium systems are installed throughout Europe, Russia, Asia and Australia, in domestic, industrial, commercial and even Shipbuilding industries. With our large portfolio, manufactured from a wide range of materials, SANHA is recognised as a respected partner of distribution and installation companies alike. As a family owned and operated business, SANHA has over 50 years of experience, employs over 650 staff and turns over app. 100 million Euro.

Manufacturing- / delivery programme:

SANHA manufactures approximately 8,000 products for the system and connection technology.

An ear for our customers

Our customers are central to all our activities. As a family enterprise, SANHA highly values an active close and long term relationship with all our partners, from designers, installers, contractors and trading companies. With over fifty years of service, we are committed to close support of our customers, with a highly experience local and international technical service.

For all practical purposes

Installation systems from SANHA are designed with the practical engineer in mind. Our "Combipress" function embodies this, saving not only time and money, but provides a maximum level of safety for a tight, state of the art connection.

We are also proud of our programme of site based training programmes and design based technical seminars, approved by CIBSE. Our local Technical Sales Managers are experienced in training, and the practical experience required, to deliver an interesting and informative session, wherever it may be.
