## **About us**

The Mühlberger Group is a highly efficient dealer in technical products for pipeline construction, industrial and pharmaceutical technology and industrial protection. We not only have a wide range of products and the best delivery, but also provide solutions to niche problems with fresh ideas that make us competitive. Our range of additional services includes technical consultation, logistics services, recognised and certified technical testing services and special mounting and production offers.

### **Success through teamwork**

Our highly motivated staff are the cornerstone of our individual services. Our teams are based on fairness and the courage to be successful. Interfaces between the divisions are clearly coordinated so that processes can be kept straightforward, with plenty of space for creatively implementing ideas.

### **Personal consultation**

A high level of specialist knowledge, the latest IT and an electronically controlled goods warehouse, which coordinates all processes, mean that you benefit from fast reaction times, flexibility and, of course, the best prices. With us, you can rely on personal consultation and support at all times; the sale of a product only marks the beginning of our service. At the Mühlberger Group, additional services are an inherent part of what we offer. This is a concept that works. We have succeeded in increasing our turnover year after year, building the basis for future-oriented growth.

To take a holistic approach that covers the entire company, to create competitive advantages for our own companies, customers and suppliers and in so doing, to optimise processes. That's the main guiding principle of our company. With this in mind, we are in direct contact and dialogue with our customers and suppliers, since it is only in this way that product and process optimisation measures can be effectively realised.

### **Trust in cooperation**

Successful customer relations are based on trust. We understand this to mean reliability when it comes to our promises and actions. Fairness in an equal partnership and credibility.

### **Commitment to the partnership**

For us, partnership means working together with a wide range of different suppliers in order to secure competitive advantages for our customers.

## **Understanding when solving problems**

Thanks to our combination of in-depth product knowledge and professional processing, we are able to offer customers long-term benefits.

## **Our standards**

Throughout Europe, the Mühlberger Group stands for reliable supply for your customers with its personal protective equipment products and technical products that meet the required quality standards.

Our high level of specialisation and focus on the needs and requirements of our customers, coupled with our understanding of production processes and sequences, enables us to provide individual, innovative solutions to meet the needs of the consumer. The most up-to-date logistics ensure reliable availability in the right place and at the right time.

We deliver on our commitment to providing consistently high quality through ongoing quality assurance measures as well as the selection of suitable suppliers.

At our sites, we live by the values of a family business as a safe, fair and reliable partner for our staff, our customers and our suppliers. Yesterday, today and in the future.
