Company profile

FEIN is the specialist for professional and extremely reliable power tools and special application solutions in metalworking, interior fitting and the automotive sector. As the inventor of the electric hand drill, FEIN has been developing innovative and unbeatably efficient solutions for everyday use which can also stand up to the toughest continuous use in industry and trade for over 140 years.

As an experienced partner to the metal industry, FEIN has an in-depth understanding of the requirements of stainless steel machining and offers a range of optimum solutions in this area. These solutions include durable, robust FEIN products and also special accessories and accessory sets that are specifically tailored to stainless steel applications.

FEIN power tools and stainless steel sets enable you to machine even hard-to-reach places without any need for dismantling.

FEIN Product groups

Pipe Saws

Robust cutting technology from FEIN's pipe machining range.

Pipe processing

For laying new pipes and repairing and replacing existing ones in an open structure, FEIN offers an extensive range of tools for work involving pipes. The FEIN tools enable efficient sawing, cutting and grinding work for both metal and plastic pipes.

Stainless steel machining

FEIN has specialised in the surface processing of stainless steel for many years. Sheets, pipes and profiles can all be given a sparkling mirror polish with FEIN power tools such as polishers and pipe belt sanders as well as stationary belt grinders from GRIT. For individual work steps there are selected system accessories designed to help you work efficiently.

Sanders

The perfect tools for rough sanding and fine sanding of surfaces, pipes and profiles.

Slitting shears

Clean, distortion-free cutting of sheet metals, profiles and pipes – with just one continuous chip.

Pipe milling cutters – cutting pipes with FEIN

The pipe cutting industry the world over is familiar with FEIN pipe milling machines. They can be used for everything from cutting to length before laying to cutting pipes which have already been laid.

Cutting pipes with FEIN

FEIN pipe milling machines mean that your work is always safe, precise and reliable.

FEIN power tools and accessories for machining pipes and profiles.

Better machining all round for pipes and profiles?

- Cleaning off dirt
- Removing scratches
- Removing welded seams
- Removing tarnishing
- Satin-finishing
- Preparing for polishing
- Polishing to a mirror polish
- Machining fillet welds

Industrial machining of pipes and profiles?

- Deburring
- Radius grinding
- Grinding mitre joints
- Removing scratches
- Preparing welded seams
- Satin-finishing
- Preparing for polishing

Optimum grinding of welded seams. Perfect satin-finishing and polishing for pipe bends
