CNC machinery and CAD supported design in connection with skilled craftsmanship guarantee the constantly high quality of our products. Facilities: Welding machines, press brakes, punches, shear, saws, plasma cutting machines, plate rolls.

**Manufacturing- / delivery programme:****Tubes, rectangular ducts, fittings**

- Longitudinal welded tubes at any length
- Fittings of all kinds
- Welded rectangular ducts at any length

**Ductwork / tube systems**

- Complete Ductwork / tube systems
- Tube systems according to DIN 24151 / 24147
- Air and flue gas tubes and ducts

**Tanks and plate construction**

- Pressureless tanks and plate constructions
- Plant components: Suction hoods and –walls, Exhaust chimneys, Cyclone dust separators, Bag houses.

Material: Steel, High temperature steel, Abrasive resisting steel, Various types of stainless steel

Dimensions: Tube diameter: 80 -3000 mm  
Height / width: 3000 x 3000 mm  
Material thickness: 2 - 8 mm  
Lengths up to 12000 mm  
Single weights up to 10 to.

Surface treatment: At customers' wishes: sand blasting, priming, coating, galvanizing, pickling.
