Unternehmensprofil:

ASV Stübbe develops, produces and markets as an internationally active company, valves, pumps, measurement and control systems.

The ASV-products are implemented in environmental, chemical and surface technology wherever aggressive, corrosive and water endangering substances are handled according to the most stringent safety standards.

Qualified personnel and modern machinery guarantee consistently high quality. Thanks to the own tool and mould production, ASV Stübbe is able to respond quickly to the customers' specifications and to guarantee flexibility and precision.

Due to the high degree of vertical integration, ranging from injection moulding and mechanical manufacture to final assembly, ASV Stübbe is able to meet individual customer requirements and produce small series in addition to standard products.

Leistungen und Lieferprogramm:

Your system supplier: Everything from one source. Specialising in modern pipework construction, the products and system components offer a comprehensive and mature range for all lines of industry. ASV Stübbe process the following thermo-plastics: PVC-U, PVC-C, PP, PVDF, PTFE and corrosion resistant metals complement the range.

Valves & Automation

Ball valves
 Diaphragm valves
 Butterfly valves
 Solenoid valves
 Monitoring valves

Pumps and Filters

Centrifugal pumps with
 mechanical seal
 Magnetic pumps
 Eccentric pumps
 Sump pumps
 Filters and accessories

Pipes | Fittings | Accessories

Pipes & fittings
 Pipe clips & pipe clamps
 Flanges, strainers,
 solvent cement, tools

Measurement & Control

Pressure relief valves, Pressure reducing valves
 Dosing ball valve and water-jet pump
 Flowmeters, flow sensors and flow transmitters
 Filling level, overflow and leakage prevention systems
 Pressure gauges and diaphragm pressure gauge guard
